

The FAA Safety Team presents:

Settling with Power Vortex Ring The Vuichard Recovery at HAI HELI-EXPO 2016

Through the years, settling with power or the vortex ring state has caused much equipment damage and numerous injuries and deaths. A new recovery technique that is much more efficient in terms of altitude loss has been developed and tested over a period of time in Switzerland and the United States. The Robinson Helicopter Company has been teaching this new technique for one-and-a-half years. This instructional session will explain in detail this new technique.

This course is offered at the HAI Rotor Safety Challenge at HELI-EXPO 2016. These sessions are FREE to all HELI-EXPO 2016 registered attendees and exhibitors.

Attend at least six Rotor Safety Challenge sessions at HELI-EXPO 2016 and receive a certificate of recognition for completing the 2016 HAI Rotor Safety Challenge.

Take the Safety Challenge in three simple steps:

1. Select safety sessions to attend from the HAI Rotor Safety Challenge Schedule. To see the full Safety Challenge schedule, visit <http://www.rotor.com/takethechallenge>.
2. At the conclusion of each session, receive an official token from the room monitor or presenter.
3. Once you have earned at least six tokens, drop by the HAI Safety Committee Booth on the show
